

How we can help secure and accelerate your Microsoft 365 Copilot adoption.

The challenge

In the rapidly evolving digital landscape, the adoption of Microsoft 365 Copilot is a key focus for organisations aiming to enhance productivity and collaboration. However, clients need confidence that any implementation safeguard your organisation against potential security risks.

The solution

We can help you gain confidence that you have a clear understanding of the safeguards required to securely adopt Microsoft 365 Copilot based on our technology enabled rapid cyber security readiness and risk exposure assessment.

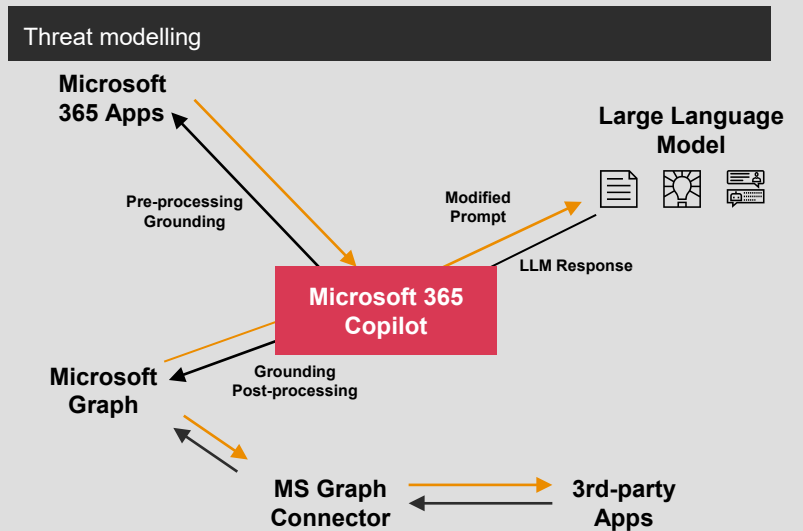

Phase 1: Microsoft 365 Copilot Cyber Readiness Assessment

Approach

Our in-depth readiness assessment offers a holistic analysis of your organisation's Microsoft 365 Copilot implementation.

We take a top down, threat led approach as well as assessing your organisation against PwC's tailor-made Microsoft 365 Copilot Security Framework; containing 60+ technical safety measures the outcomes of which cover:

- Data Security & Compliance
- Access and Permissions Management
- Microsoft 365 Eco-system Security
- Copilot Platform

Data life cycle readiness

Microsoft 365 tenant readiness

Report

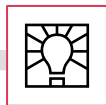

Data Storage and Security

Evaluate your data storage practices in Microsoft 365 environment.

Data Sharing Review

Leverage native M365 capabilities to identify oversharing of potentially sensitive M365 data.

Compliance and Monitoring

Examine your compliance policies and management processes.

Access and Permission Management

Review your access and permission management processes for your M365 environment.

Data Loss Prevention

Conduct an analysis of your M365 data loss prevention strategy.

Security and Isolation

Evaluate security policies within your Microsoft 365 environment to identify potential vulnerabilities.

Express Readiness Report

Deliver a report on your preparedness for implementing M365 Copilot, including remediations steps.

Outcomes

01

Risk exposure assessment with scoring across the different domains.

02

A prioritised list of tactical recommended actions.

03

High-level remediation roadmap and recommendations.

04

Overall readiness for adopting M365 Copilot.

Phase 2: Post Readiness Assessment Remediation Support

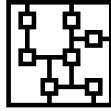

We will adopt a risk-based strategy that aligns to your M365 Copilot deployment. We will take action to fix issues identified in the cyber security readiness and risk exposure assessment. Our remediation efforts will target these specific areas:

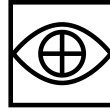

Microsoft Purview

Defender for Office 365

M365 Copilot

Entra ID

Defender for Identity

Additional value add services (optional)

Business readiness:

Engage leaders and employees in identifying priority use cases, balancing productively and responsibility. Enabling your organisation to measure value to fully understand the Rol of Copilot.

Data readiness:

Verify data compliance with privacy policies and implementing data governance for accurate outputs through prompt refinement.

Operational and support readiness:

Prepare your IT service desk for managing issues and prioritising defects effectively. Rank use cases according to their alignment with the business processes.

AI governance:

Define an acceptable use policy and the do's and don'ts when using Copilot, set up an easy way to report and handle any issues like hallucinations.

Adoption readiness

Supporting employee adoption of Copilot through persona based change journeys, initial communications, training and the establishment of user communities across the business.

Why choose PwC?

We are rated by Forrester as a **leader in European cybersecurity consulting services providers.**

Microsoft Alliance PwC is Microsoft's 3rd largest customer globally and Microsoft's #1 Advisory Services Provider covering a range of technology and services.
