

Digital Project Management Solutions

Digital Assets for your S/4 Projects

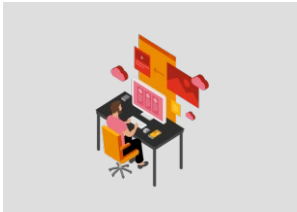

February 2022

Digital transformation has long been more than just a passing fad, and is now essential for business success. Yet, digital transformation is a very time-sensitive issue and can therefore be challenging to manage. This is why we must adapt our project management approach for successful business transformations.

From our experience, digital project management solutions can enhance and accelerate your digital transformation.

Feel free to contact us if you want to learn more.

Intelligent Project Management Office Automated digital project reporting

Intelligent Project Management Office project reporting is a concept to minimize manual effort and create new project insights.

It combines several data sources in a standardized core framework enabling a highly automatized PMO solution. Benefits include daily project steering, a single source of truth, historical data for time-driven analysis with gamification potential. It is tailored to SAP S/4HANA projects but can be applied to any digital transformations.

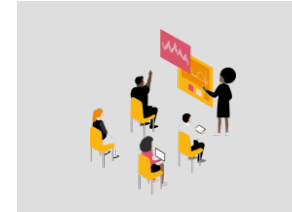

Test Result Tracking Board Simplify Test Orchestration

Test Result Tracking Board is a solution eliminate redundant activities and create a transparent 360° view on testing.

It aggregates different external testing data sources and follows the same core framework as the Intelligent Project Management Office tool. It can therefore easily be integrated. The Test Tracking Board enables real time test steering by eliminating data conversion needs. Dashboard filters provide easy access for customers and a new interactive way of test reporting.

Automatic Workshop Planning RPA supported meeting creation

Automatic Workshop Planning is a solution which automatically creates workshop invitations based on RPA.

Automated workshop creation can accelerate your workshop planning activities with all information in a centralized matrix, an automated invite list and RPA supported meeting creations. Benefits include great time saving opportunity through automation, standardized communication towards participants and a single source of truth.
